the Introduction

furniture with identities.

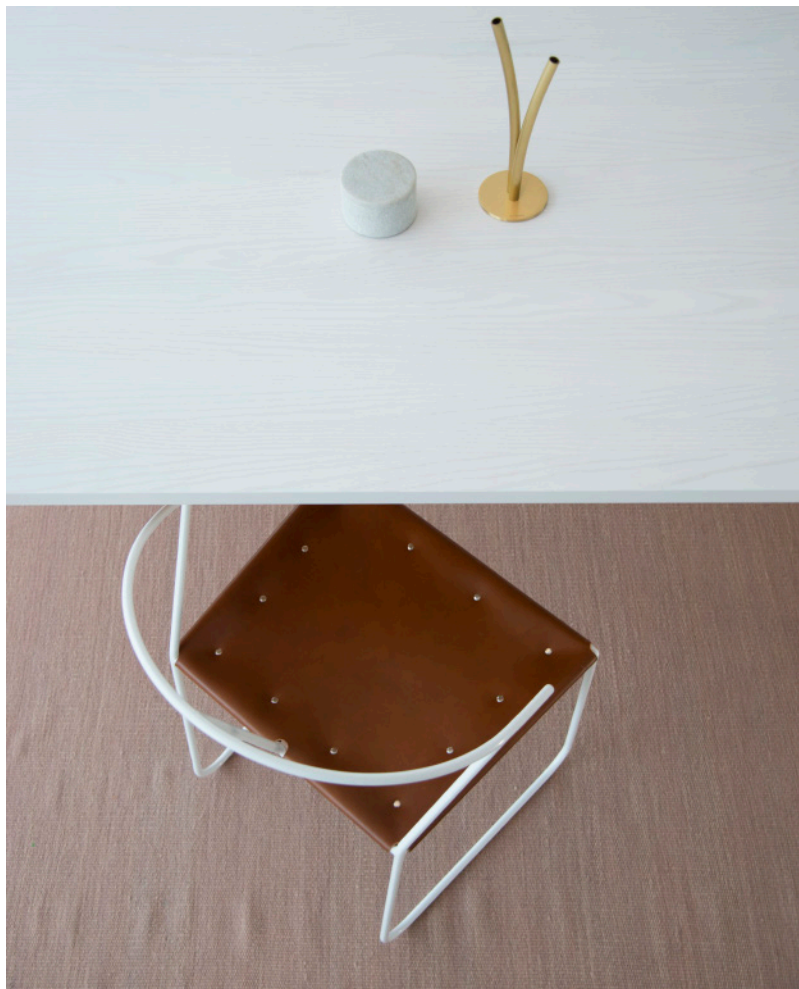

Head of Design Johan Åhrström

Furniture are the pieces that fill up one of the most important things for us, our own home. Our home is the place where we rest, gather energy and spend time with our loved ones. The place where we can be ourselves to the fullest, our sanctuary. The second most important place is your working space. For that reason it's so important what we fill it with.

Our vision of our furnitures is that it should be just as much of a statement and a decorative piece as much as a function to it. With that said we put extra energy into finding a minimalistic yet an expressive and dynamic furniture design that feels interesting over a long time. We work exclusively with solid and long-lasting materials such as steel, massive wood, leather and stone. All in the highest possible quality.

So you can enjoy our furnitures for a long time.

COLLECTION
